

SHREYA JAYARAM POOJARY

Chicago, IL | (224) 421-0824 | spooj@uic.edu | LinkedIn | GitHub | Credly

PROFESSIONAL SUMMARY

DevOps engineer with 6+ years of experience designing and automating cloud infrastructure and deployment pipelines for enterprise healthcare technology applications. Skilled in AWS and Azure, infrastructure-as-code with Terraform and CloudFormation, and CI/CD pipelines using GitHub Actions and Harness. Built and operated containerized workloads on Kubernetes, achieving 50% faster deployments and 80% more efficient provisioning while reducing release failures by 30%. Experienced with AI-enabled and AIOps platforms for AI-driven monitoring, log analysis, and operational automation.

EDUCATION

University of Illinois at Chicago

Jan 2025 – May 2026

M.S., Management Information Systems

Sahyadri College of Engineering and Management

Aug 2014 – May 2018

B.E., Computer Science

TECHNICAL SKILLS

- **Platforms & Systems:** AWS, Azure DevOps, Linux Systems, AI-enabled Platforms, AIOps Tools, Cloud Providers, Healthcare Technology
- **Infrastructure as Code:** Terraform, AWS CloudFormation, AWS CDK
- **CI/CD & DevOps:** Harness CI/CD, GitHub Actions, Jenkins, AWS CodePipeline, CodeBuild, SonarQube, JFrog
- **Containers & Orchestration:** Docker, Kubernetes, AWS Lambda, Serverless
- **Monitoring & Observability:** AWS CloudWatch, Prometheus, Grafana, NewRelic, Opsgenie, PagerDuty, AI-Driven Monitoring, Logging Tools, Alerting Tools
- **Languages & Scripting:** Python, Bash/Shell, Java, Node.js, Groovy, YAML, JSON, SQL, Automation Scripting
- **Collaboration & SDLC:** Jira, Confluence, Aha!, Git, Agile/Scrum, Runbooks, Technical Documentation, Continuous Improvement

PROFESSIONAL EXPERIENCE

Advanced Business and Healthcare Solutions Pvt. Ltd.

Senior DevOps Engineer

Oct 2023 – Dec 2024

Enterprise healthcare technology firm serving clients across North America and APAC — supported 5 regulated SaaS healthcare products

- Architected AWS cloud migration strategies for 3 enterprise healthcare technology applications using CloudFormation and CDK, leveraging automation scripting to achieve a 40% improvement in deployment speed and reduce infrastructure costs by 20%.
- Designed and standardized CI/CD pipelines in Harness and GitHub Actions across multiple project teams, driving continuous improvement, reducing release failures by 30%, and cutting overall deployment time by 50%.
- Built comprehensive monitoring and alerting systems with CloudWatch, SNS, Lambda, Prometheus, and Grafana on Linux systems, enabling proactive issue detection and AI-driven monitoring of production health, reducing downtime by 25%.
- Diagnosed complex deployment and infrastructure failures using CloudWatch logs and AWS X-Ray; led post-incident reviews and delivered root-cause analyses to technical and non-technical stakeholders, reducing mean time to resolution (MTTR) by 30%. Served on-call rotations across 5 healthcare technology products as primary escalation point for critical environment and CI/CD pipeline incidents.
- Served as trusted technical advisor to directors and project leads across 4 engineering teams, presenting tooling comparisons (Harness vs. GitHub Actions vs. CodePipeline) and cloud-migration proposals that drove platform-selection decisions, saving an estimated 200+ engineering hours per quarter.
- Acted as primary escalation point for customer-reported issues, communicating fixes in plain language and filing detailed reproduction steps to engineering; improved customer satisfaction scores by 15%.

DevOps Engineer

Jul 2020 – Sep 2023

- Automated cloud operations and CI/CD workflows for over 20 projects using Jenkins, GitHub Actions, and YAML on Linux systems, cutting deployment time by 40% and improving release reliability.
- Led M&A; toolchain integration, migrating acquired organizations from Azure DevOps to Jira and Aha! with custom data-mapping scripts and automated import workflows, ensuring process alignment and faster integration.
- Developed and maintained CI/CD pipelines for microservices using GitHub Actions and Harness, enabling automated deployments and halving the release cycle time.
- Automated infrastructure provisioning via AWS CloudFormation, EC2, S3, IAM, and CDK with custom Python/Bash scripts, improving provisioning efficiency by 80%.
- Managed containerized application deployments using Docker and Kubernetes (EKS) across hybrid cloud and on-premises environments, ensuring high availability and deployment reliability.

Associate DevOps Engineer

Jul 2018 – Jun 2020

- Architected and administered the enterprise toolchain (AWS, Terraform, Harness, GitHub) and SDLC suite (Aha!, Jira, Confluence, SonarQube, Black Duck), reducing engineer setup time and ensuring high deployment reliability across cross-functional workflows.
- Developed and deployed custom Jira plugins (full-stack) to automate KPI reporting, pulling real-time data from the DevOps toolchain to provide leadership with actionable insights into team velocity and project health.
- Engineered end-to-end Jira lifecycle automations via custom scripts and webhooks for real-time card updates, eliminating manual administrative overhead and ensuring data consistency across the development pipeline.
- Authored operational runbooks and incident response documentation, establishing standardized procedures for deployment validation, environment troubleshooting, and on-call escalation workflows.

PROJECTS

NLP-Based Multi-Database Query System

- Built an AI-enabled operations tool using Amazon Bedrock and FastAPI — an NLP-to-SQL interface for AI-driven log and data querying; provisioned AWS infrastructure via Terraform and automated deployments with GitHub Actions CI/CD pipelines.
- Presented system architecture and real-time demo at UIC Denodo AI Learning Day and AWS Imagine, articulating design decisions and use cases to technical stakeholders.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03): Mar 2026
- Harness Certified Expert – Continuous Integration Developer: Nov 2025
- SnowPro Associate: Platform Certification: 2026
- AWS Academy Graduate: Cloud Architecting | Developing | Operations | Security | Data Engineering | ML Foundations: 2025

RECOGNITION & LEADERSHIP

- Three-time SPOT Award recipient: for automation, data migration, and cloud process improvements (2019–2024).
- President, INFORMS Student Chapter at UIC: 2025–Present: Organize technical events and industry panels, coordinating speakers and facilitating discussions between academic researchers and industry practitioners.
