

# SHREYA JAYARAM POOJARY

Chicago, IL | (224) 421-0824 | [spooj@uic.edu](mailto:spooj@uic.edu) | [LinkedIn](#) | [GitHub](#) | [Credly](#)

## PROFESSIONAL SUMMARY

AWS Certified Solutions Architect and Harness Certified Expert with 6+ years of progressive DevOps experience specializing in cloud migration, infrastructure automation, and CI/CD pipeline engineering. Delivered measurable results including 50% faster deployments, 80% improvement in infrastructure provisioning efficiency, and 30% reduction in release failures across 20+ enterprise projects. Adept at translating complex technical trade-offs into business value for executive and cross-functional stakeholders, with speaking experience at AWS Imagine and UIC Denodo AI Learning Day.

## EDUCATION

University of Illinois at Chicago | *M.S., Management Information Systems* (GPA: 4)

Chicago, IL Jan 2025 - May 2026

Sahyadri College of Engineering and Management | *B.E., Computer Science*

Aug 2014 - May 2018

## TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Azure DevOps
- **Infrastructure as Code:** Terraform, AWS CloudFormation, AWS CDK
- **CI/CD & DevOps:** Harness CI/CD, GitHub Actions, Jenkins, AWS CodePipeline, CodeBuild, SonarQube, JFrog
- **Containers & Orchestration:** Docker, Kubernetes, AWS Lambda, Serverless
- **Monitoring & Observability:** AWS CloudWatch, Prometheus, Grafana, NewRelic, Opsgenie, PagerDuty
- **Languages & Scripting:** Python, Bash/Shell, Java, Node.js, Groovy, YAML, JSON, SQL
- **Collaboration & SDLC:** Jira, Confluence, Aha!, Git, Agile/Scrum, Technical Documentation

## PROFESSIONAL EXPERIENCE

OneAdvanced | *Senior DevOps Engineer*

Oct 2023 - Dec 2024

- Architected AWS cloud migration strategies for 3 enterprise applications using CloudFormation and CDK, achieving a 40% improvement in deployment speed and reducing infrastructure costs by 20%.
- Designed and standardized CI/CD pipelines in Harness and GitHub Actions across multiple project teams, reducing release failures by 30% and cutting overall deployment time by 50%.
- Built comprehensive monitoring and alerting systems with CloudWatch, SNS, Lambda, Prometheus, and Grafana, enabling proactive issue detection and reducing production downtime by 25%.
- Diagnosed complex deployment and infrastructure failures using CloudWatch logs and AWS X-Ray; delivered root-cause analyses to technical and non-technical stakeholders, reducing mean time to resolution (MTTR) by 30%.
- Served as trusted technical advisor to directors and project leads across 4 engineering teams, presenting tooling comparisons (Harness vs. GitHub Actions vs. CodePipeline) and cloud-migration proposals that drove platform-selection decisions, saving an estimated 200+ engineering hours per quarter.
- Acted as primary escalation point for customer-reported issues, communicating fixes in plain language and filing detailed reproduction steps to engineering; improved customer satisfaction scores by 15%.

*DevOps Engineer*

Jul 2020 - Sep 2023

- Automated cloud operations and CI/CD workflows for over 20 projects using Jenkins, GitHub Actions, and YAML, which cut deployment time by 40% and improved release reliability
- Led M&A toolchain integration, migrating acquired organizations from Azure DevOps to Jira and Aha! with custom data-mapping scripts and automated import workflows; trained cross-functional teams on the new SDLC standards, reducing integration time and aligning processes
- Developed and maintained CI/CD pipelines for microservices using GitHub Actions and Harness, enabling automated deployments and halving the release cycle time
- Automated infrastructure provisioning via AWS CloudFormation, EC2, S3, IAM, and CDK with custom Python/Bash scripts, improving provisioning efficiency by 80%.
- Managed containerized application deployments using Docker and Kubernetes (EKS) across hybrid cloud and on-premises environments, ensuring high availability and deployment reliability.

*Associate DevOps Engineer*

Jul 2018 - Jun 2020

- Architected and administered the enterprise toolchain (AWS, Terraform, Harness, GitHub) and SDLC suite (Aha!, Jira, Confluence, SonarQube, Black Duck), reducing engineer setup time and ensuring high deployment reliability across cross-functional workflows.
- Developed and deployed custom Jira plugins (full-stack) to automate KPI reporting, pulling real-time data from the DevOps toolchain to provide leadership with actionable insights into team velocity and project health.
- Engineered end-to-end Jira lifecycle automations via custom scripts and webhooks for real-time card updates, eliminating manual administrative overhead and ensuring data consistency across the development pipeline.

## PROJECTS

**NLP-Based Multi-Database Query System**

- Built an NLP-to-SQL interface on Amazon Bedrock and FastAPI, deployed via AWS Innovation Sandbox using Terraform and GitHub Actions.
- Delivered a live demo at UIC Denodo AI Learning Day and served as a panelist at AWS Imagine, presenting architecture decisions and use cases to technical audiences.

## CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03): Mar 2026
- Harness Certified Expert – Continuous Integration Developer: Nov 2025
- SnowPro Associate: Platform Certification: 2026
- AWS Academy Graduate: Cloud Architecting | Developing | Operations | Security | Data Engineering | ML Foundations: 2025

## RECOGNITION & LEADERSHIP

- **Three-time SPOT Award recipient:** for automation, data migration, and cloud process improvements (2019–2024).
- **President, INFORMS Student Chapter at UIC (2025 - 2026):** Organize technical events and industry panels, coordinating speakers and facilitating discussions between academic researchers and industry practitioners.
- **Chancellor's Student Service Award recipient, University of Illinois at Chicago (2026):** campus-wide recognition for contributions to the student community and leadership.
- **Panelist AWS Imagine (2025):** presented architecture decisions and live demo for an NLP-to-SQL system built on Amazon Bedrock.
